

Computer Science and Mathematics (B.MES.108)
Tutorials, Summer Semester 2020

Preface

This is a collection of tutorials given by myself, the author, in the summer of 2020, for the course *Computer Science and Mathematics* that was taught as part of the program *Molecular Ecosystem Sciences (B.Sc.)*. It contains both the questions presented to the students and their solutions, in the best and most elaborate way I could write them.
